

# 4years Frontend Developer - Im Hun

- I am a person who passionately immerses myself.
- I am a person with endless curiosity.
- I am a person with a positive mindset.

## Experience

### Web3 Frontend Developer

Aergo | 2023.01 – present

**Responsible for developing and maintaining frontend open-source features for the Aergo blockchain.**

- Developed the [Aergo Connect 3.0](#) Chrome extension personal wallet. ( [Deployment](#) | [GitHub](#) )
  - Migrated from Manifest2 to Manifest3
  - Added Multi Accounts management and Private Network functionality
  - Integrated Hardware Wallet Nano Ledger support

#Typescript #Vuejs #Vuex #Chrome Extension #Manifest3 #IndexedDb #ServiceWorker

- Improved UI and developed contracts interactive (Read & Write) features for [Aergo Scan](#). ( [Deployment](#) | [GitHub](#) )
  - Implemented a feature that allows users to directly execute transactions and query contract data through smart contracts in the scanner
  - Added Internal Tx viewing feature and original source code viewing feature

#Typescript #Vuejs #Vuex

- Developed the [Aergo Bridge](#) service for Aergo and Ethereum bridge and admin. ( [Deployment](#) )
  - Successfully bridged over 5 million Aergo to Ethereum within 4 months of launch (as of September 13, 2024)

#Next.js(v14) #react-hook-form #react-query #wagmi

- Migrated [Aergo SDK \(Hera.js\)](#) from GRPC to GRPC JS. ( [GitHub](#) )
  - Updated the SDK to be compatible with the latest version of Node.js

### Frontend Developer

Blocko | 2022.01 – present

**Responsible for Web3 services and UI development, including backend API integration**

- GEMVERSE - Added Aptos wallet integration and personal signature feature
  - Implemented a feature that securely sends signatures to the backend by serializing them during the signing process
- Improved features and fixed bugs for the enterprise private blockchain (Aergo Enterprise Manager)
  - Fixed bugs in the chain and node editing functionality and synchronized the data to the latest state

## Projects

# Road To Interview (November 2021 ~ 4 weeks)

1. A web app designed for developers to practice technical interviews on their own. ( [GitHub](#) | [Planning Document](#) )

[Frontend] JavaScript, React, Emotion, Redux

[Client Deployment] AWS (S3, Route53, Certificate Manager, CodePipeline, CloudFront)

- Created a video interview page using the WebRTC API
- Developed a job listing page for developers using server-crawled data
- Set up client auto-deployment and PWA deployment
